

# SUMMICRON-C

The Leica Summicron-C set of prime lenses are comprised of 11 focal lengths from 15mm to 135mm. All the lenses are T2.0 and with consistent 95mm front diameters and a compact size that is expected of modern cine lenses.

---

## CINEMATIC IMAGES

The Summicron-C lenses offer authentic color rendition, natural focus transitions and fall off, and a creamy sharpness that captures everything from actresses to architecture with a humane and true representation. Skin tones remain soft and smooth while hard edges and fine details retain their resolution, which makes these one of the most versatile sets of cine lenses available.

---

## COMPACT, LIGHTWEIGHT AND MATCHED

Measuring 101mm for all the lenses except the 15mm and 135mm which are both 118mm and weighing from 1.2 kg to 1.8 kg, the Leica Summicron-C lenses offer a fantastic image for a very manageable size that is well suited for small camera configurations, handheld work or drones and gimbals.

---

## LARGE IMAGE CIRCLE AND ILLUMINATION

The Leica Summicron-C lenses were designed with larger sensors in mind. Their massive image circle (minimum 36mm diameter) easily covers ARRI Alexa Open Gate and RED 6K formats without vignetting, corner shading, or loss of focus.
